- | | | | |
|--------------|-----------|-------------|----------|
| • JavaScript | • .NET | • AngularJS | • SQL |
| • C# | • Git | • Node.JS | • jQuery |
| • Java | • Swagger | • Express | • Azure |

Computing Projects

Software Development Senior Project

August 2018-April 2019

City Rescue Mission Volunteer Management System

Description: A SaaS web application designed to manage volunteer information and track volunteer service hours.

- Led a team of 4 UNF Computing Seniors to complete a year-long development project with non-profit City Rescue Mission.
- Designed use cases for features that address business problems.
- Maintained source control with Git and deployment to Azure Cloud.
- Technologies include: C#, ASP.NET Web Application, .NET Framework 4.6, Entity Framework, OAuth2, SQL, SendGrid, Bootstrap, jQuery, DataTables, Jira

Web Development Project

August 2017-December 2017

39Canine Webstore (Quasi-company)

Description: A webstore that sells genetic kits for dogs, displays and manages results. Honorable Mention Award at the UNF Fall Computing Symposium, November 2018.

- Led a team of 4 UNF Computing Juniors to develop a quasi-company website based on the company 23andMe.
- Designed core functionality to meet business goals.
- Maintained source control with Git.
- Technologies include: C#, ASP.NET Web Application, .NET Core 2, Entity Framework Core, OAuth2, SQL, Bootstrap.
